

PackRight Manufacturing

Project Overview

Standardising vendors, checking policy, and reaching a reviewable purchase decision.

Step 1 - Standardise

- Raw quotes arrive as INR all-inclusive, USD + freight + IGST, or ex-works without GST. The assistant normalises all to a single landed-INR table (incl. GST + freight).

Step 2 - Compare

- Four weighted criteria: Quality 40%, Cost 25%, Lead Time 25%, Reliability 10% - editable live in the sidebar.

Step 3 - Recommend & Review

- A strength policy check (min grade 8) flags non-compliant vendors. The best compliant vendor is recommended with an explainable rationale, and a human reviews or overrides it.

Step 4 - Draft only

- The tool records a draft decision for Finance. No purchase, no payment, no commitment is made by the system.

PackRight Manufacturing

The Fictional Vendors, Criteria & Outcome

Three sample quotations for 10,000 heavy-duty corrugated cartons.

Vendor	As-received quote	Landed INR	Lead	Strength	Result
CorrLite Packaging	INR all-inclusive	4,85,000	5 days	9/10	Recommended (95.5)
EuroCarton Works	USD 6,600 + IGST	6,54,192	18 days	10/10	Runner-up
PackDesk Supplies	Ex-works, GST extra	4,95,600	8 days	6/10	Non-Compliant

Key capabilities

- Standardised landed-INR comparison table
- Weighted scoring with editable sliders + green-energy bonus
- Procurement-policy check: auto-flag and exclude Non-Compliant vendors
- Recommendation with transparent reasoning; user can override
- Approval history log + draft-only records for Finance
- Policy Q&A, clarification emails (mailto), PDF & pasted-quote parser

Why these criteria?

- Quality / strength (40%) - burst resistance is non-negotiable
- Lead Time (25%) - the packaging line cannot wait for cartons
- Cost (25%) - landed INR for a fair like-for-like comparison
- Reliability (10%) - on-time delivery history

PackRight Manufacturing

Project deliverables

- index.html - static web app (HTML + CSS + JS), no backend, \$0 to host
- README.md, DEMO_SCRIPT.md, SUBMISSION_FORMAT.md
- 8 screenshots of the running dashboard (assets/screenshots)
- This overview (PPTX + PDF)
- Live deployment: sahilll5858.github.io/packright-procurement

Safety & control statement

- This assistant produces a transparent, overrideable recommendation ONLY.
- It performs no purchase, no payment and no contractual commitment on its own.
- The final financial decision always rests with authorised PackRight personnel -
- the tool simply passes a draft to Finance for sign-off.

Reproduce & demonstrate

- Open index.html in any browser, or visit the live URL.
- Follow the narrative in DEMO_SCRIPT.md (8-step).
